## DETAILED ACTION

### *Election/Restrictions*

Claims 1-12 and 20 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(B), claims 13-19, directed to the process of making or using an allowable product, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action mailed on August 20, 2004 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

### *Allowable Subject Matter*

Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance.

The reference of record fails to teach or suggest, either singularly or in combination at least the limitation of a stacked semiconductor configuration wherein the uppermost semiconductor chip is mounted with a circuit-formation surface facing the substrate and

electrically connected to the lower semiconductor chip through the plurality of the bumps, and the encapsulation resin layer is formed so that the top surface and the portions of the side surfaces adjacent to the top surface of the uppermost semiconductor chip is exposed to the outside of the encapsulation resin layer and the circuit-formation surface and the portions of the side surfaces adjacent to the circuit-formation surface of the uppermost semiconductor chip are covered with the encapsulation resin.

Additionally, the reference of record fails to teach or suggest, either singularly or in combination at least the limitation of the method claim for mounting semiconductors in a stacked configuration wherein the uppermost semiconductor chip is mounted with a circuit-formation surface facing the substrate and the encapsulation resin layer is formed so that the top surface and the portions of the side surfaces adjacent to the top surface of the uppermost semiconductor chip is exposed to the outside of the encapsulation resin layer and the circuit-formation surface and the portions of the side surfaces adjacent to the circuit-formation surface of the uppermost semiconductor chip are covered with the encapsulation resin.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
